**January 21 - *Seed: The Untold Story*** - Few things on Earth are as miraculous and vital as seeds. Worshipped and treasured since the dawn of humankind. SEED: The Untold Story follows passionate seed keepers protecting our 12,000 year-old food legacy. In the last century, 94% of our seed varieties have disappeared. As biotech chemical companies control the majority of our seeds, farmers, scientists, lawyers, and indigenous seed keepers fight a David and Goliath battle to defend the future of our food. In a harrowing and heartening story, these reluctant heroes rekindle a lost connection to our most treasured resource and revive a culture connected to seeds. SEED features Vandana Shiva, Dr. Jane Goodall, Andrew Kimbrell, Winona Laduke and Raj Patel. *Running time: 94 min.*

**February 18 - *Last Barn Dance*** - Randy Lewis knows that losing his dairy business would mean losing his livelihood – his farm is limping along through an economy that has decimated most other family farms in Alamance County – but Randy is most worried about losing his way of life and ending a family heritage that has hosted nearly 50 years worth of barn dances. The farm is fragile, the band is old, the barn is beaten, and Randy, with no kids of his own and little faith the younger generation will pick up the pieces, is trying to save the dance. *Running time: 32 min.*

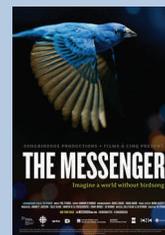

**March 18 - *Minimalism*** - How might your life be better with less? *Minimalism: A Documentary About the Important Things* examines the many flavors of minimalism by taking the audience inside the lives of minimalists from all walks of life—families, entrepreneurs, architects, artists, journalists, scientists, and even a former Wall Street broker—all of whom are striving to live a meaningful life with less. *Running time: 80 min.*

**April 15 - *AINA—That Which Feeds Us*** - AINA (pronounced "eye-nah") means, "that which feeds us" in the Hawaiian language. The film highlights a simple yet effective path for addressing some of the most pressing environmental and health crises facing the island of Kauai and the entire world. That may sound like an outstanding claim, but as AINA vividly illustrates, such is the power of agriculture and consumer choices for the planet. *Running time: 22 min.*

**May 27 - *The Messenger*** - Su Rynard's wide-ranging and contemplative documentary explores our deep-seated connection to birds and warns that the uncertain fate of songbirds might mirror our own. Moving from the northern reaches of the Boreal Forest to the base of Mount Ararat to the urban streets of New York. *The Messenger* brings us face-to-face with a remarkable variety of human-made perils that have devastated thrushes, warblers, orioles, tanagers, grosbeaks and many other airborne music-makers. *Running time: 90 min.*
